Vacuum packaging - Potatoes

MAP (Modified Atmosphere Packaging) - Dates

Packaging of medical sterile goods

Skin packaging - Steak

PRIMUS

STANDARDISED HIGH PERFORMANCE THANKS TO INNOVATIVE TECHNOLOGY

Do you want to package your products attractively and securely? Food, non-food or medical sterile goods? Under vacuum, with protective gas, in high quality as skin packaging or in shrink film, perhaps even fill it when it is still hot with Variosteam?

With the VARIOVAC Primus, we have the right concept for all areas and for every application and you have the right packaging. Thanks to our uncompromising, continuous further development of machine technology, it has established itself on the world market as one of the most reliable deep-drawing machines since its market introduction in 2013.

The highly developed VARIOVAC RAPID AIR SYSTEM facilitates the perfect forming of the flexible and semirigid films and a reliable sealing of the packaging with up to 20 cycles per minute . Thanks to the VARIOVAC High Speed IPC, the process times can be depicted in real time. A special stainless steel frame construction guarantees maximum stability for the machine; the four-pillar lifting system generates maximum closing pressures.

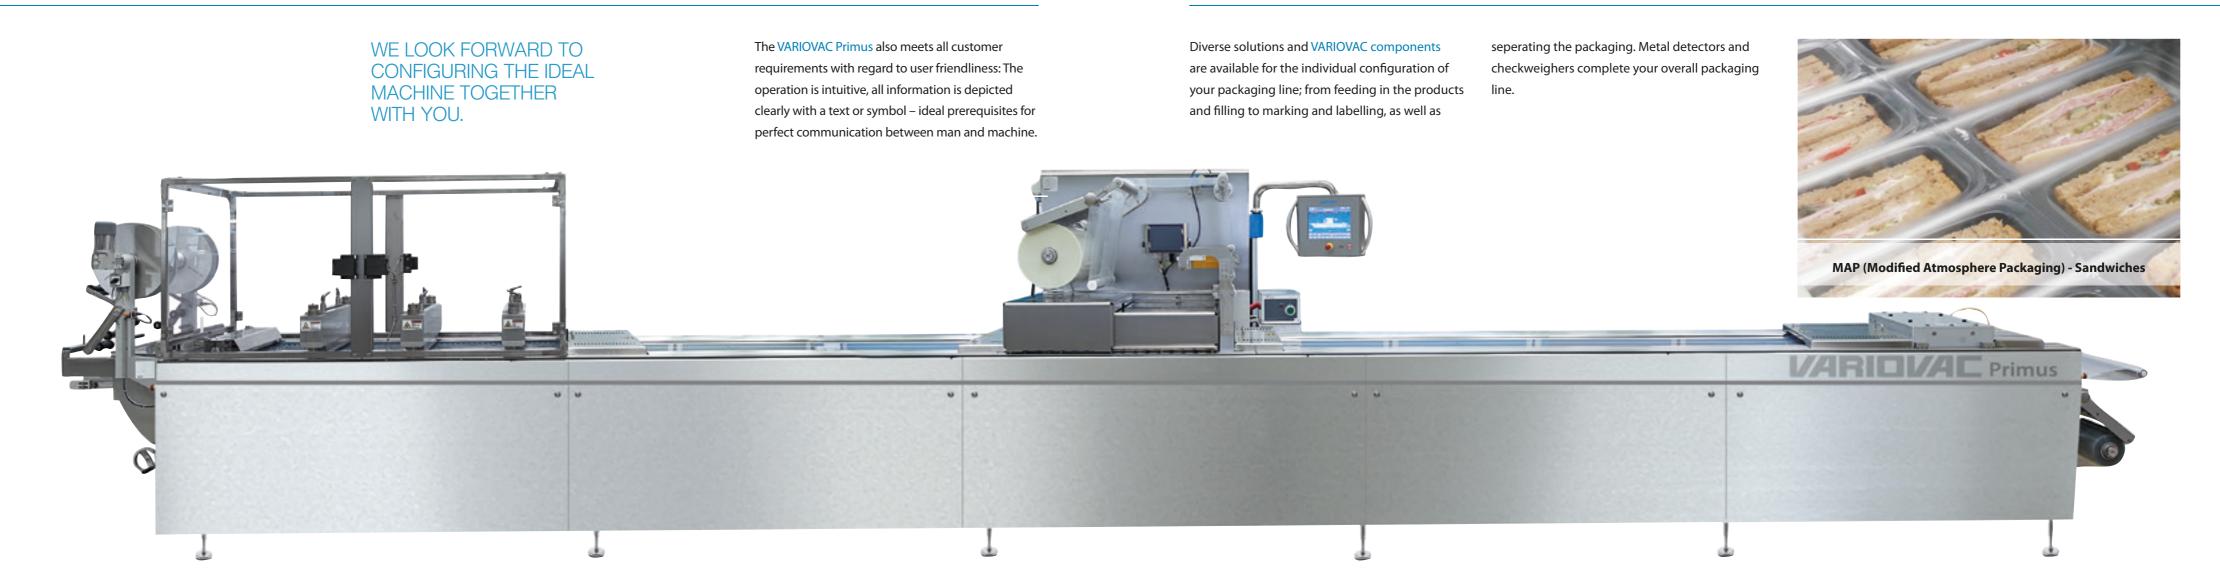

Parts of the consistent hygiene concept are open chain profiles and the avoidance of critical points and areas; the entire machine can thus be easily and reliably cleaned.

PRIMUS

VERSATILE AND HIGH PERFORMANCE

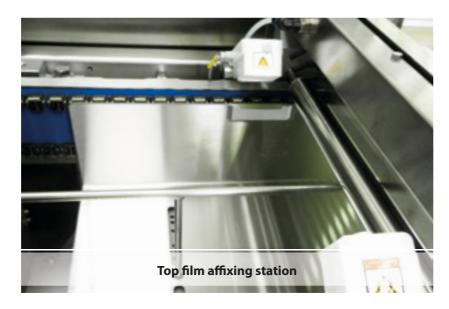

PRIMUS

VERSATILE AND HIGH PERFORMANCE

PRIMUS SIMPLIFIED MACHINE OPERATION

- ✓ Top film affixing station improves eye spot registration
- ✓ Manual film advance controls located at the machine infeed
- ✓ Long holes in the safety covers make feeding in the film easier to see and control
- ✓ Faster packaging format change-overs:
- Divider sets in the forming and sealing dies instead of individual dividers
- Snap-on sealing frame
- Lock-and-load knife shafts for long cut

PRIMUS INTUITIVE OPERATING SYSTEM

- ✓ Industrial PC realized on a 12.1" touchscreen display
- ✓ Ergonomically designed, hinged operation panel is accessible from both sides of the machine
- ✔ Program and save up to 80 individualized recipes
- ✓ USB port allows for easy data backup
- ✓ Multiple language options makes the VARIOVAC Primus universally accessible
- ✓ Remote diagnostic capability (optional)

PRIMUS

WASH-DOWN DESIGN

Machine cleanliness is essential to maintain product safety and shelf-life, especially in the food processing industry. Each part of the VARIOVAC Primus is designed to improve cleanability, access, inspection, and consistency of cleaning.

- ✓ Stainless steel construction including all safety covers and side panels
- ✓ Hinged side panels are easily removable
- ✓ Open chain profile makes removing trapped product a breeze
- ✓ Easy access to both sides of the chain improves cleaning
- ✓ No dirt traps

PRIMUS

TECHNICAL INFO

MARIO MAC simpler faster better

Frame length different module lengths of 5.0 to 12 m

Film widths 320 – 560 mm

Film strength Bottom film up to 550μ

Advance length 100 – 700 mm Packaging depth up to 135 mm

High-performance control IPC, swivel-mounted 12.1" touchscreen

Packaging output up to 20 cycles / min

Packaging types Sealing, Vacuum, MAP, Skin, Steam, Shrink

Cooling integrated heat exchanger without consumption of water

Compressed air min. 6 bar (without addition)

Electrical voltage 3 x 230 V N/PE

3 x 400 V N/PE (Standard)

50/60 HZ
